Fast Food

Most of the children love eating fast food. This includes burgers, pizzas, hotdogs, fish and chips. Although such food is tasty, it doesn't provide us with enough vitamins, that our bodies need. This food is not very healthy as it usually contains a lot of fat. Eating fast food often can result in weight gain.

However, you can make a meal at the fast food restaurant healthier by choosing a burger which has vegetables in it, by skipping the fries and by having plain water instead of carbonated soft drinks.

PART ONE:
SECTION ONE: READING COMPREHENSION: (07pts)
1- Answer these questions according to the text:
